

Political science of the Slovak republic

With respect to the existence of state, the essence of its existence is represented by the issue of the division of political power. Current political science defines the form of the state as an organised structure, or the complex of manners and methods through which a state power is executed in the direction inside the state and outwards. The form of the existing government as well as the state regime characterises the political system of state. The aim of this course is to explain basic political terms, their meaning and application in current political system of the Slovak republic. The lecturer wants to apply all fundamental terms of political science into the day to day realities.
